

MAP IT!

To do this activity you will need two things:

1. An atlas to help you identify countries and mark places you find on your map here.
2. Your completed **Where in the World** activity sheet.

Your Where in the World activity sheet helped you find out where some of the people on the web site originally came from.

Find those countries on this map (using an atlas to help you). Colour each country in a different colour. Perhaps friends in your class were born in other countries too. You could add them to your map.

Create a key for your map to show which person came from which country.
